To Whom It May Concern:

It is with the great honor to give reference to Duratek and it's staff. Duratek has recently completed approximately 1,200 feet of wall at CAMPING on the GULF. The wall was in 3 sections with multiple heights and varying grade. There were a few moderate obstacles to overcome during the construction process. I must say that the level of professionalism displayed from the salesperson Bob Jenson, to the manager Shaun, to the foreman Scott, and to all of the crew was far above my expectations. With two crews on the job, what was originally planned as a 10 day job was completed in 4 days. The two crews worked as one unit and never slowed from the impressive and precise installation. For anyone considering this type of wall construction and Duratek for the installation, I highly recommend to look no further. I commend to you Duraktek, who will do a fantastic job for you. I am available for further specific comments at (850) 585-5422.
